PROFESSIONAL SUMMARY

Results-oriented and analytical Data Analyst with strong foundational skills in programming, logic building, and frontend web development. **Adept at advanced data analysis using MS Excel and Google Sheets** to organize, process, and derive actionable insights from complex data sets. **Highly proficient in logic building and problem-solving using Python**, with a solid understanding of programming fundamentals in C and C++. Proven ability to create clean, responsive digital solutions using HTML, CSS, and JavaScript. A continuous learner with experience teaching or utilizing block-based coding via Scratch, excellent at bridging technical software development with clear, numbers-driven business data analysis.

EXPERIENCE

CIT Campus, Karachi — Student

JUNE 2026 - PRESENT

Designed and structured customized excel spreadsheets for academic assignments, utilizing formulas, data validation and charts to present clear data models.

Fazaia School, Karachi — Student

MAY 2023 - APRIL 2024

Built fundamental python script using conditional logic and control loops to process user input and solve algorithmic assignment problems.

EDUCATION

Air University, Karachi — Bachelor: Software Engineering

SEPTEMBER 2026 - FUTURE

Bachelor of Software Engineering

PECHS Govt. College, Karachi — Intermediate: Pre Engineering

MAY 2024 - MAY 2026
